

Multi-purpose 10-LED Bargraph Display Board

The DSP10 is a multi-purpose 10-LED bargraph display PCB for use as a stand-alone bargraph display or with Onstate bargraph meter modules (BM-series). It is designed for use with 3mm, 5mm, 5050 SMD or similar

footprint LEDs with common positive wiring. A custom 10-segment LED display using multiple colour LEDs will provide a bright, appealing look to your project. Its small size, multi-function design makes it very useful as multi-purpose indicators not possible with standard 10-segment bargraph displays.

PCB specification:

1. 1/16" FR4 PCB material, RoHS and lead-free.
2. Through-hole plated, HASL.
3. Thick copper traces, double-sided traces.
4. Robust design, reliable operation.
5. 11 pin header at 0.1" spacing.
6. 0.1" LEDs or 5050 SMD LEDs.
7. 1x 0.1" mounting hole.
8. 0.50" x 2.43"
